Areas of Expertise

Prof. M.C.Misra possesses multifaceted and wide-ranging interests and contributed immensely in the clinical practice as below:

Trauma Care Services:

I have the unique distinction of possessing advance training in Trauma care services for full one year at the University of Manchester, UK in 1988-89. I am equipped with tremendous knowledge in the organization of trauma care services in the country. I am at present heading the first ever APEX Trauma Center in INDIA one of its kind in the South Asia Region.

Minimally Access Surgery (laparoscopic surgery or Key-hole surgery):

I have been involved from the inception of this new technique in India. Actually All India Institute of Medical Sciences, New Delhi was the first Govt. funded institution to acquire this technology for the benefit of the society at large. It was one of the very few Institutions and hospitals (Govt. or Private) across India to acquire the new technique way back in 1991. Laparoscopic technique has been routinely offered to all the patients (Poor or otherwise) for the last 14 years and many thousands of economically compromised patients have benefited by this new technique. I have been actively involved in training of practicing surgeons and residents in the new technique to perform this skill with utmost safety. Towards recognition of his contribution in this field, I was awarded the most prestigious professional award i.e. Dr. B.C.Roy National Award in 1996. The Citation and the medallion were given away on 20th November 1997 by the then President of India in a ceremony in Rashtrapati Bhawan.

Breast Cancer:

My dedication and services to breast cancer patients has brought national and international acclaim and recognition. I have established a dedicated Breast Cancer Clinic at AIIMS. Hundreds of women with breast cancer have been successfully treated and provided multidisciplinary care at this clinic at AIIMS since 1984 under my leadership. I am regularly working in collaboration with DD News in a health program - "Total Health" – to create awareness about the breast cancer and other common health problems.

Other areas of expertise:

I am privileged to have acquired unique distinction today to possess expertise in other areas of surgical disciplines which is a rare combination and extremely rare to find today:

Surgical education and training with emphasis on decision-making in clinical practice

Biliary Tract Surgery: Laparoscopic cholecystectomy including Iatrogenic Biliary Fistulae and Benign Bile Duct injuries (stricture)

Repair of groin and ventral hernia with and without prosthetic material particularly laparoscopic repair of incisional and ventral hernia

Gastrointestinal Surgery,

Surgical Oncology,

Surgical Obstructive Jaundice (experience with Pancreaticoduodenal Resection)

Colo-rectal Surgery: Non-operative Management of Anal fistula

Breast Disease: Benign breast diseases

Evidence-based Surgery

Thyroid cancer and surgery for benign thyroid diseases.

Foreign assignment: February 1997 – October 2002

Senior Consultant Surgeon and Head, General Surgery Department, Ministry of Health, Mafraq Hospital, Abu Dhabi. Mafraq Hospital is a Tertiary care referral centre for whole UAE. My responsibilities included tertiary patient care of cosmopolitan population, research, teaching and training of postgraduate students and other general surgeons, preparing policy guidelines for the Ministry of Health, and organization and administration of surgical disciplines. I was the supervisor and Co-ordinator for the newly introduced MRCS training programme of the Royal Colleges of UK. I was member of the Surgical Advisory Committee of the UAE, a decision making body for the surgical teaching and training and organizing other academic activities in the country.

TEACHING AND TRAINING EXPERIENCE

I have been actively involved in the undergraduate and postgraduate teaching programme of the All India Institute of Medical Sciences, New Delhi, India, for the last 20 years (as a full time faculty member and later as Head of the Department of Surgical Disciplines). I was instrumental in the implementation of newer methods of undergraduate teaching and assessment (OSCE) at the same Institute in collaboration with University of Dundee, U.K. I have participated in several Technology Transfer Programs in various fields of clinical teaching and assessment.

I have been actively involved since 1992, in the training of general surgeons to teach minimally invasive techniques under videoscopic control for gallbladder diseases. I have personally provided training to more than two dozen general surgeons from all over India and South Asia in the safe performance of laparoscopic cholecystectomy. Towards achieving this goal, I organised several international Workshops with live demonstration of various laparoscopic procedures with 'Hands-on experience on abdominal-pelvi-trainer' (details below).

At Mafraq Hospital, I was actively involved in surgical teaching and training to candidates preparing for Fellowship of various Royal Colleges in U.K., Ireland, Canada and USMLE (USA).
